SUBJECT CATEGORY

KEY WORDS (Optional) (Comma separated words or phrases)

54-Man/System Technology and Life Support

STI ABSTRACT (500 words or less) (Optional)

After working with NASA for 56 years, retired NASA Engineering and Safety Center (NESC) Technical Fellow Hank Rotter shared his expertise in life support and active thermal control with U.S. Spacesuit Knowledge Capture Program Manager Cinda Chullen. Ms. Chullen interviewed Mr. Rotter about his early years and his flight and hardware experience during his time at NASA. This storytelling event spanned most of NASA's existence. At the end of the interview, attendees had an opportunity to ask questions.

STI CATEGORIZATION

No software, including without-limitation source code, may be released under an NF1676. Software of any kind may only be released by NASA in accordance with NPR 2210.1C.
